

<b>KBArticle</b>	<b>Title</b>	<b>Issue Type</b>
933579	MS07-042: Description of the security update for Microsoft XML Core Services 6.0: August 14, 2007	Security
925902	MS07-017: Vulnerability in GDI could allow remote code execution	Security
929123	MS07-034: Cumulative security update for Outlook Express and for Windows Mail	Security
930178	MS07-021: Vulnerability in Windows CSRSS could allow remote code execution	Security
931768	MS07-027: Cumulative Security Update for Internet Explorer	Security
938123	MS07-048: Vulnerability in Windows Gadgets could allow remote code execution	Security
938127	MS07-050: Vulnerability in Vector Markup Language could allow remote code execution	Security
939653	MS07-057: Cumulative security update for Internet Explorer	Security
941202	MS07-056: Security Update for Outlook Express and Windows Mail	Security
928090	MS07-016: Cumulative security update for Internet Explorer	Security
933729	MS07-058: Vulnerabilities in RPC could allow denial of service	Security
935807	MS07-038: Vulnerability in Windows Vista Firewall could allow information disclosure	Security
931213	MS07-032: Vulnerability in Windows Vista could allow information disclosure	Security
933566	MS07-033: Cumulative Security Update for Internet Explorer	Security
937143	MS07-045: Cumulative Security Update for Internet Explorer	Security
936782	MS07-047: Vulnerability in Windows Media Player could allow remote code execution	Security
939778	MS07-053: Vulnerability in Windows Services for UNIX could allow elevation of privilege	Security
939025	FIX: Error message when you use the Microsoft Program Maintenance Utility (Nmake.exe) in Visual Studio 2005: "01075: The build method of FileName is not specified"	Hotfix
939783	FIX: The value of the ImeMode property automatically changes to the Off value in the .NET Framework 2.0	Hotfix
929427	The Windows Vista Application Compatibility Update	Hotfix
932593	FIX: You receive an error message when you try to install the original release version of SQL Server 2005 or SQL Server 2005 Service Pack 1 on a computer that is running Windows Vista	Hotfix
935280	July 2007 Windows Vista Application Compatibility Update	Hotfix
939004	After you install Adobe Encore DVD 2.0 on a windows vista-based computer, the Adobe Encore DVD 2.0 Library folder content is not available	Hotfix
939677	An application that is packaged by a version of InstallShield that is earlier than InstallShield 12 cannot be installed under the system account context in Windows Vista	Hotfix
942089	You cannot install version 2.0.3 of an Omniquad Total Security program on a Windows Vista-based computer	Hotfix
870853	Office 2003 and 2007 Office documents open read-only in Internet Explorer	Hotfix
925369	FIX: A windows form may not work as expected when you use the Show method in a COM client application to display the form on a computer that is running the .NET Framework 2.0	Hotfix
925492	FIX: Error message when you add a Web reference to a project in Visual Studio 2005: "The custom tool 'MSDiscoCodeGenerator' failed"	Hotfix

926425	FIX: Error message when you try to query data from a column of the XML data type or from a variable of the XML data type in SQL Server 2005: "An error occurred while executing batch"	Hotfix
928188	Ink programs may not work correctly on a digitizer in Windows Vista	Hotfix
928870	FIX: An exception is not handled correctly when you use a try-catch block to handle an exception from multi-threads in the .NET Framework 2.0	Hotfix
929637	Error message during windows vista startup if the Nero InCD program is installed and if the "Special pool" feature is enabled in the Driver Verifier utility: "Stop 00000050"	Hotfix
929777	Error message when you try to install Windows Vista on a computer that uses more than 3 GB of RAM: "STOP 0x0000000A"	Hotfix
929916	Description of the security update for the .NET Framework 2.0 for Windows Vista: July 10, 2007	Hotfix
930261	You randomly receive a "Stop 000000xA" error in Storport.sys when you start Windows Vista	Hotfix
930618	You cannot access files on a memory card in a networked printer's built-in memory card reader, and you receive an error message in Windows Vista or in Windows XP SP2: "\\<IP_Address>\memory_card refers to a location that is unavailable"	Hotfix
930917	An optical disc appears to be blank after you format the disc by using the Live File System component on a windows vista-based computer	Hotfix
930979	You may receive a "Stop 0x0000007E" error message after you enable the BitLocker Drive Encryption feature in Windows Vista	Hotfix
931174	Update for the Windows Vista Customer Experience Improvement Program	Hotfix
931338	FIX: Error message when you use DEVPATH environment variables in a .NET Framework 2.0 ASP.NET web application: "Could not load file or assembly '<AssemblyName>' or one of its dependencies"	Hotfix
931619	When you click the Safely Remove Hardware icon in Windows Vista, the device in question may not be removed as expected	Hotfix
931654	Error message when you format a disc by using the Live File System component on a windows vista-based computer: "windows was unable to complete the format"	Hotfix
931674	You may be unable to use a WSD-based scanner driver to transfer scanned data in Windows Vista	Hotfix
931689	The chkdsk.exe tool cannot detect bad clusters or bad sectors on a windows Server 2003-based computer when the size of a compressed file is larger than 4 gigabytes (GB)	Hotfix
932045	Error message when you use a network connection to copy a large file from one windows vista-based computer to another windows Vista-based computer: "The connection has been lost"	Hotfix
932394	A timer does not resume operation after a workflow is reloaded in Microsoft Windows Workflow Foundation	Hotfix
932814	You receive an error message that states that a driver was not installed because of a file copy error in Windows Vista	Hotfix
933207	You may be unable to read from DVD-R DL or DVD+R DL discs that were recorded in Windows Vista	Hotfix
933242	Windows ReadyDrive does not work in Windows Vista if the first partition of a hybrid hard disk drive has less than 32 MB of free space	Hotfix
933272	The system time lags when you restart a Windows Vista-based computer that supports High Precision Event Timer	Hotfix
933595	Error message when you try to install a nouix on a windows vista-based computer in a domain: "Installer encountered an error: 0x8007177f. This machine is disabled for file encryption"	Hotfix
933649	A Web page that contains special characters in the URL may not be printed as expected on a WSD printer in Windows Vista	Hotfix

933662	When a 16-bit application passes command-line parameters to another application on a Windows Vista-based computer, the second application does not receive the command-line parameters	Hotfix
933771	Windows Explorer stops responding or the SvcHost.exe process stops responding when you try to copy encrypted files to a WebDAV resource in Windows Vista	Hotfix
933876	The USN Journal record contains an incorrect file name when you move a file in Windows Vista, in Windows Server 2003, or in Windows XP	Hotfix
934111	An update is available for Subsystem for UNIX-based Applications in Windows Vista that addresses daylight saving time changes in 2007	Hotfix
934202	You experience slow performance on a Windows Vista-based computer after you establish a VPN connection	Hotfix
934429	The "Allow hybrid sleep" option is intermittently missing from the Advanced Settings tab of the Power Options dialog box in Windows Vista	Hotfix
934529	An update that lets you configure the location of the temp folder is available for the .NET Framework 2.0	Hotfix
934637	You may be unable to install a device on a computer that is running a non-English version of Windows Vista	Hotfix
934839	FIX: You may receive an exception when you browse a .NET Framework 2.0 ASP.NET Web application	Hotfix
935200	Error message when an application calls the RegisterTypeLib API to register a type library in Windows Vista: "Access denied"	Hotfix
935276	When you try to install a Web Services on Devices (WSD)-based device on a Windows Vista-based computer, the installation is not completed successfully	Hotfix
935366	Access may stop responding when you open a remote database	Hotfix
935427	When you transfer a file between a Windows Vista-based client computer and a file server, Windows Vista stops responding	Hotfix
935495	The Windows System Assessment tool displays incorrect processor information about an Intel Ultra Mobile Platform-based computer that is running Windows Vista	Hotfix
935553	The WMI Provider Host program may stop responding when you run a program that uses the Online Files WMI Provider on a Windows Vista-based computer	Hotfix
935606	Backup system files are not restored as expected when you use third-party system restore applications on a Windows Vista-based computer	Hotfix
935663	Changes to an offline file are not saved to the server when files are synchronized in Windows Vista	Hotfix
935755	You cannot access a shared network resource that is hosted by a Windows Vista-based computer if the SMB request packet exceeds the MTU size	Hotfix
936205	Files are corrupted if the computer switches to suspend mode while you synchronize offline files in Windows Vista	Hotfix
936344	FIX: A significant delay may occur when you try to debug an ASP.NET-connected application in Visual Studio 2005	Hotfix
936613	The performance of gaming graphics may be less than you expect, based on the Windows Experience Index score in Windows Vista	Hotfix
936707	FIX: A .NET Framework 2.0 managed application that has an Authenticode signature takes longer than usual to start	Hotfix
936756	Error message in Windows Vista when you use Registry Editor to load a registry hive file that is on a shared network resource: "Cannot load \\HivePath\filename: Access is denied"	Hotfix
936983	FIX: The call to the System.Transactions.CommittableTransaction.Commit method may always be blocked in a .NET Framework 2.0-based application	Hotfix
937082	You cannot configure the maximum number of concurrent SMB requests that are sent to a Windows Vista-based file server	Hotfix

937187	Error message when you try to install a new hardware device in windows vista: "windows encountered a problem installing the driver software for your device"	Hotfix
937381	error message when you try to shut down windows vista: "The instruction at 0x77f05148 referenced memory at 0x96ac3ce4. The memory could not be written"	Hotfix
937426	You are prompted to activate Windows Vista after you start the system in diagnostic startup mode	Hotfix
938091	After you resolve an online files synchronization conflict by using the "Keep both versions" option, the conflict occurs again on a Windows Vista-based computer	Hotfix
938092	You may be unable to delete the cache of online files from the client-side caching (CSC) cache on an online windows vista-based client computer	Hotfix
938475	Error message when you use a windows vista-based computer to try to access files on a windows vista-based file server: "<DriveLetter>:\ is not accessible. Insufficient system resources exist to complete the API"	Hotfix
938758	FIX: The Unload method may stop responding (hang) in a Windows Workflow Foundation project	Hotfix
939008	error message when you start a windows vista-based computer on which windows ReadyBoost is running: "STOP: 0x0000000f-SESSION3 INITIALIZATION FAILED"	Hotfix
939165	An update is available for the Windows Vista Customer Experience Improvement Program	Hotfix
939720	Error message when you start a Windows Vista-based computer: "STOP: 0x00000050 PAGE_FAULT_IN_NONPAGED_AREA"	Hotfix
939750	After you encrypt resources by using the PACE Anti-Piracy InterLock system on a windows vista-based computer, some applications may work incorrectly	Hotfix
940716	The time is incorrect by one hour when you use the System.timezone property in windows vista in the Jerusalem time zone during daylight saving time	Hotfix
940856	You experience a 45-second delay when you try to start the Windows Remote Assistance component in Windows Vista	Hotfix
941020	You receive occasional Stop errors after you install a driver that manages on-board flash memory on a Windows Vista-based computer	Hotfix
941021	Error message when you repeatedly restart a Windows Vista-based computer: "Stop 0x0000007E"	Hotfix
941025	When you press a keyboard button to start a program, there is a delay before the program starts on a portable computer that is running Windows Vista	Hotfix
941067	All the contents are pinned and are filed in a redirected folder when the "Folder Redirection" policy setting is applied to a windows vista-based computer	Hotfix
941137	The EQUAL SIGN key does not work on a USB PC98 keyboard that is connected to a Windows Vista-based computer	Hotfix
941298	Error message when you try to access a webDav shared file from a windows vista-based computer: "System error 1597 has occurred. Mutual Authentication failed"	Hotfix
941311	An Ultra DMA Mode 5 transfer mode may be listed as an Ultra DMA Mode 2 transfer mode in Windows Vista	Hotfix
941386	FIX: Error message when you run an ASP.NET 2.0 web application that is built on the .NET Framework 2.0 after you install the MS07-040 security update: "Type 'System.Web.HttpHeaderCollection' is not marked as serializable"	Hotfix
941492	Stop error message when the computer resumes from hibernation in Windows Vista: "STOP 0x0000000A"	Hotfix
941853	You are prompted to type your user credentials when you use Internet Explorer to access files on a web Distributed Authoring and Versioning (WebDav) site on a Windows Vista-based computer	Hotfix
941890	On a windows vista-based computer, you are prompted to enter your user credentials when you use Internet Explorer to access files on a WebDAV site	Hotfix

942365	On a windows vista-based computer, you cannot view the pop-up menu when you try to access a DVD-VK format DVD that was created by using a consumer electronics DVD recorder	Hotfix
942682	error message when you try to use the Computer Management tool on a windows vista-based computer that has a USB card reader or a built-in card reader: "Windows - No Disk"	Hotfix
942894	An update that addresses the change to daylight saving time in 2007 is available for windows Server 2003 R2-based computers and for Windows Vista-based computers that are running Subsystem for UNIX-based Applications	Hotfix
943412	You may experience delays when an operating system shuts down if the computer is running a managed service together with the .NET Framework 2.0	Hotfix
943451	You cannot access a network share on a Unix/MCP server from a windows vista-based computer by typing a UNC path that does not include the share name	Hotfix
928365	Description of the security update for the .NET Framework 2.0 for windows Server 2003, windows XP, and windows 2000: July 10, 2007	Hotfix
930597	Some registry-based policy settings are lost and error messages are logged in the Application log on a Windows XP-based computer	Hotfix
933778	A program that uses windows HotStart does not start as quickly as expected after a windows vista-based computer wakes up from sleep	Hotfix
934907	Error results when you run the "gpupdate /force" command on a computer that is running windows vista: "User policy could not be updated successfully"	Hotfix
935977	A string appears as a question mark if an application uses the ReadEventLogA function to read the string from the event log in windows Vista	Hotfix
936162	Windows Management Instrumentation may not correctly report information about certain USB disk devices	Hotfix
937630	Error message in windows vista when you use Event viewer to try to connect to another computer: "There are no more endpoints available from the endpoint mapper"	Hotfix
937658	When a program calls Task Scheduler 1.0 APIs to display the general page property of a task, the check boxes on the task page overlap in Windows Vista	Hotfix
936021	Description of the security update for Microsoft XML Core Services 3.0: August 14, 2007	Hotfix
933251	FIX: Internet Explorer may use a high percentage of the CPU resources when error code 404 is returned	Hotfix
937248	Description of the Jet 4.0 Database Engine update rollup for the release version of Windows Vista: May 11, 2007	Hotfix
941179	FIX: The MSXML 6.0 old parser does not convert line feeds to spaces as expected	Hotfix
928439	Windows PowerShell 1.0 Installation Package for Windows Vista	Hotfix
929735	You may not find the file that you want when you use Advanced Search to search by date and you use a non-Gregorian calendar format in Windows Vista	Hotfix
930955	Moveuser.exe is incompatible with Windows Vista and is replaced by the new Win32_UserProfile WMI functionality	Hotfix
931836	February 2007 cumulative time zone update for Microsoft Windows operating systems	Hotfix
931969	The Microsoft Software License Terms appear in the incorrect language when you try to view them in a program in Windows Vista	Hotfix
932404	A folder does not open when you click the folder in the All Programs list in Windows Vista	Hotfix
932406	The windows desktop may stop updating correctly after a windows vista-based computer has been running for an extended period of time	Hotfix
934056	Error message when you try to print a picture from the Search window in Windows Vista: "Windows can't find this picture"	Hotfix

935415	The original file is overwritten when you select a file name from the history list in the Save As dialog box in Windows Vista	Hotfix
935855	error message when you try to start Internet Explorer 7 in windows vista: "You must be an administrator to open Internet Explorer on this desktop"	Hotfix
936054	error message when you try to move a folder to a mount point folder that is located on the same disk in windows vista: "Access Denied"	Hotfix
936460	error message when a domain user tries to change the password of a client computer that is running the German version of windows Vista: "Status: C000006C/C000006C"	Hotfix
937230	An incorrect cell is selected when you click to select a cell in a ListView common control in Windows Vista	Hotfix
938062	A red "X" appears in the icon for a mapped network drive in Windows Vista, even though you can successfully access the drive	Hotfix
938838	Windows Vista displays the incorrect dedicated video memory size for certain display adapters	Hotfix
938885	"Performance Information and Tools" lists the DirectX version as "DirectX 9.0 or better" even though the computer is running DirectX 10 in Windows Vista	Hotfix
938906	error message when you run the NetProj.exe utility on a windows vista-based computer to connect to a network projector: "The network projector is unable to display your desktop at the current screen resolution."	Hotfix
938977	A hotfix is available to add a new time zone in Venezuela (GMT-4:30) for the year 2007 in windows XP, windows Server 2003, and Windows Vista	Hotfix
939021	The link for the Documents folder may be redirected to the Desktop folder on a Windows Vista-based computer	Hotfix
940427	A hotfix is available to change the daylight saving time for the (GMT+02:00) Cairo time zone in the year 2007 for windows XP, windows Server 2003, and Windows Vista	Hotfix
940508	In Windows Vista, a USB device may lose data if you right-click the device in Windows Explorer and then click Eject	Hotfix
940894	two identical Catalan entries are listed for the language selection on the first page of the Out Of Box Experience (OOBE) wizard on a Windows Vista-based computer	Hotfix
941436	redundant Pri<x>.tmp files are generated after a user who uses roaming user profile logs on from a windows vista-based client computer	Hotfix
941673	After you add the CopyFileBufferedSynchronous registry entry in windows vista, a file copies only slightly more quickly when you use Windows Explorer to copy the file to another computer	Hotfix
942220	Folders on a Windows Vista-based client computer are not redirected as expected in a Windows Server 2003 domain	Hotfix
942435	error message when you try to copy files from a windows vista-based computer to another computer by using windows Explorer: "Out of memory There is not enough memory to complete this operation"	Hotfix
942493	you are prompted to provide your administrative credentials when you try to open a Systems Management Server (SMS)-based item in Control Panel on a Windows Vista-based computer	Hotfix
942543	you cannot view certificate information in windows Internet Explorer 7 or in Certificate Manager if you use an unattended answer file to install Windows Vista	Hotfix
942869	The read speed of the DVD-R/RW drive is much slower than the expected speed on a Windows Vista-based computer	Hotfix
943000	A hotfix is available to update the (GMT-3:00) Brasilia time zone and the (GMT-4:00) Manaus time zone for 2007 through 2008 in Windows XP, Windows Server 2003, and Windows Vista	Hotfix
943440	You cannot unlock a Windows Vista-based computer after you log on to an Active Directory domain	Hotfix
943805	An item that you copy to a Windows Vista desktop does not appear on the desktop even though it appears in the Desktop folder	Hotfix

884534	FIX: Internet Explorer may stop responding when you set the "display" style for the DIV HTML element to "none"	Hotfix
889333	Print queue shows incorrect number of pages when you print a Web page in Internet Explorer 6 or Internet Explorer 7	Hotfix
905866	Description of the definition updates for Windows Mail	Hotfix
906473	FIX: A new window always opens when you click a link that has a specified target in a WebBrowser control-based application	Hotfix
925255	Power consumption increases when you run a WPF-based program that runs an animation in Windows Vista	Hotfix
925271	A Toshiba Tablet PC that is running Windows XP with Service Pack 2 stops responding when you try to run a command	Hotfix
925832	FIX: Error message when you browse a file that uses a custom MIME type in Internet Explorer 6 and Internet Explorer 7: "The file you are downloading cannot be opened by the default program"	Hotfix
928089	The computer may respond very slowly as the Phishing Filter evaluates Web page contents in Internet Explorer 7	Hotfix
928387	Internet Explorer stops responding after you click a link on a Web site	Hotfix
928494	InfoPath 2003 crashes when you click inside the Date Picker control on a form and then press the LEFT ARROW key	Hotfix
929763	Version 5.00 of the Mongolian Baiti font may be displayed incorrectly in Windows Vista	Hotfix
929798	windows Internet Explorer 7 may not correctly recognize the zone to which a network resource belongs when you access the resource by using a mapped drive in Windows Vista or in Windows XP with Service Pack 2	Hotfix
930627	The private data of the DEVMODE data structure may be corrupted when you use raw mode to print a document in a 32-bit application on a computer that is running a 64-bit version of Windows	Hotfix
931195	FIX: Error message when an application tries to use Internet Explorer 7 to retrieve a proxy configuration script: "1003 ERROR_CAN_NOT_COMPLETE"	Hotfix
932044	A web site cannot set a cookie if the Domain attribute is in uppercase characters and has an odd number of characters in Internet Explorer 7	Hotfix
932243	The updates that you apply to a Multilingual User Interface (MUI) Language Pack are lost when you restart a computer that is running Windows Vista	Hotfix
932471	FIX: Error message when you try to open or to create a protected XPS document by using the XPS viewer that is included with the .NET Framework 3.0: "Cannot open this document because your permissions have expired"	Hotfix
932539	The screen may go blank when you try to upgrade the video driver on a Windows Vista-based computer	Hotfix
932562	When you try to open an FTP site by using a Web proxy in Windows Internet Explorer 7, you cannot open the FTP Web site	Hotfix
932652	A Windows SideShow-compatible device or the related Gadgets do not work reliably in Windows Vista	Hotfix
932653	The pointer for a high performance mouse does not move correctly in Windows Vista	Hotfix
932866	FIX: The right edge or the lower edge of an exclusionary clipping region can be drawn in a GDI+ application on a computer that is running Windows XP, Windows Server 2003, or Windows Vista	Hotfix
932988	Files from a Canon EOS 1D or 1DS camera may be corrupted after you use windows Photo Gallery, windows Live Photo Gallery, or Windows Explorer to edit the file metadata in Windows Vista or in Windows XP SP2	Hotfix
933006	A Web page is blank in Internet Explorer 7	Hotfix
933014	FIX: An application uses the Favorites folder of Internet Explorer 7 as the root directory when the application calls the "DoOrganizeFavDlg" function	Hotfix
933105	Relative file: URIs of the form "/<DriveLetter>:/<path>/<FileName>" do not resolve correctly in Internet Explorer 7	Hotfix

933133	When you try to use Internet Explorer 7 to download a file from a Web page, the file name changes	Hotfix
933256	Error message when you try to print an Office document that appears in a frame in Internet Explorer 7: "The document in this frame cannot be printed as laid out"	Hotfix
933288	Touch input stops working when two users are logged on at the same time in Windows Vista	Hotfix
933590	The Flight Simulator X game display flickers and become corrupted on a windows vista-based computer that is connected to more than one monitor	Hotfix
933612	A mail program cannot connect to an Exchange Server 2007 server by using SSL over SMTP port 587	Hotfix
933942	Error message when you restart a Windows Vista-based computer: "Windows Calendar has stopped working"	Hotfix
934008	The windows vista desktop appears black after you enable the "Hide and disable all items on the desktop" policy setting or the "Disable all items" policy setting	Hotfix
934014	FIX: windows Internet Explorer 7 does not download an ActiveX control that is referenced in a CODEBASE attribute when you open a Web page that contains the OBJECT element and the CLSID attribute is missing	Hotfix
934275	You cannot watch streaming video or download a file after you install Windows Internet Explorer 7	Hotfix
934282	warning message when you upgrade Adobe Flash Player in Internet Explorer 7 on a windows vista-based computer: "This program will open outside of Protected mode"	Hotfix
934376	You may be unable to use an FTP application to upload a file to a remote server on a computer that has Internet Explorer 7 installed	Hotfix
934888	Some Korean characters do not appear correctly in the Tablet PC Input Panel on a Windows Vista-based Tablet PC	Hotfix
935544	FIX: Windows Internet Explorer 7 may crash when you use it to visit a Web site	Hotfix
935560	When you use Remote Desktop Connection to connect to a terminal server, PNG images do not appear in Internet Explorer 7 during that RDP session	Hotfix
935575	FIX: when you try to use windows Internet Explorer 7 to display a Scalable Vector Graphics (SVG) file on a local computer, Internet Explorer 7 cannot display the SVG file	Hotfix
935579	FIX: when you access an external document by using a link in an inline frame in Internet Explorer 7, the value of the document object is returned as "undefined"	Hotfix
935607	The CopyImage function may fail in Windows Vista if you use this function to copy a large bitmap	Hotfix
935729	You cannot open a Web page by using Windows Internet Explorer 7 if the URL of the Web page contains non-ASCII characters	Hotfix
935775	You receive a script error in Internet Explorer 7 when you include certain characters to specify a window name parameter in the "Window.Open" method	Hotfix
935776	FIX: The InternetQueryOptionw function returns a value of true when you use the INTERNET_OPTION_URL option flag as the second parameter in Internet Explorer 7	Hotfix
935777	FIX: The buffer size of the InternetQueryOptionw function is half of its actual size if you use INTERNET_OPTION_URL as the second parameter in Internet Explorer 7	Hotfix
935778	Session cookies may be lost after you open a file that has a local file path or a UNC file path in Internet Explorer 7	Hotfix
935779	FIX: An Internet shortcut does not display the correct icon in Internet Explorer 7	Hotfix
935786	You cannot add a web site to the "Trusted sites" zone when Internet Explorer 7 is installed even when the user account belongs to the Administrators group	Hotfix
935851	FIX: Internet Explorer 7 in Windows Vista starts to render a Web page before the handling of the "onload" event has finished	Hotfix

935903	windows Internet Explorer / stops responding if a modal dialog box is open when you try to redraw a windows Internet Explorer / window	Hotfix
935936	you receive a Stop error message on a windows Vista-based computer: "Stop 0x00000001 (0x00000000, 0x7FFDC000, 0X0000FFFF, 0X00000000)"	Hotfix
936060	An incorrect character is displayed when you input a character in an ANSI-based application on a computer that is running windows Vista	Hotfix
936176	Underlined Japanese characters print without the underline in Windows Vista	Hotfix
